

## **An Overview of Free Resources help you to Embed Inclusion when using Technology**

Margaret McKay eAdvisor for Inclusion at the Regional Support Centre Scotland South & West will deliver her pick of the pops and will provide you with an up to date overview of resources to help you to embed inclusion when using technology.

### **This RSCtv session will provide advice and guidance for:**

- Lecturers and other staff who create information which will be accessed online.
- Extended Learning Support/Disability Advisors.
- Policy makers.
- Staff developers.
- A wide range of support roles including libraries, marketing and other support staff.

During this RSCtv session Margaret will signpost you to a range of free resources including inclusion websites, blogs, guidance material, and software to embed inclusion into your area of practice.

This 20 minute session will offer a whistle stop tour of:

### **Inclusive practice with everyday resources**

Learn about resources which will provide you with different ways to make better use of what you already know featuring everyday resources such Word documents, PowerPoint's and PDF documents more flexibly, to benefit all learners (not only those with identified disabilities or learning needs).

## **Supporting users by providing free enabling technologies**

Give your learners independence - show them tools to support how they access online materials tell them where they can get hold of free enabling technologies to match their learning style and support learning needs.

## **Resources to support independent learning**

Find guidance on making library services and study areas accessible to more users; by providing tools for learners and providing text books in appropriate formats.

## **How did you do that? Learning from practice across the UK**

Often we just get on with our work and do the best we can, however very often our everyday practice provides wonderful solutions to student barriers to learning. Learn where to find interesting case studies which feature everyday examples of ways that staff and students have worked to find solutions to support students.

## **Sharing knowledge: The best of the Blogs**

Hear about the best blogs and social networks where people with an interest in sharing good practice about accessible and enabling technology can share information and good practice
